

## 1. Dashboard

- **KPI Cards:** Quick metrics for Total Revenue, Total Jobs, Active Customers, and Completion Rate.
- **Revenue Overview:** An area chart showing revenue trends
- **Job Status Distribution:** A pie chart showing the breakdown of current month jobs (Completed, In Progress, Scheduled, Pending).
- **Recent Jobs Table:** Paginated quick-view table displaying the latest work orders across all technicians with status badges and view actions.
- **Field Team Status:** Real-time tracker for technicians on the field including their current status (On Job, En Route, Available), trade role, and dynamic ratings.
- **Upcoming Appointments:** A sequential list of the next scheduled visits displaying date, time, service type, customer, and assigned tech.

## 2. Customers

- **KPI Tracking:** Metrics for Total Customers, Active Leads, Service Agreements, and Average Revenue per Customer.
- **Tabbed Navigation:** Switch seamlessly between **Customers**, **Leads**, and **Agreements**.
- **Advanced Search & Filtering:** Filter by customer type (Residential vs Commercial), lead service interests, and custom statuses.
- **Paginated Data Tables:** Sortable tables containing contact details, physical locations, lifetime value (LTV), and assigned technicians.
- **Quick Actions:** Directly call, email, edit, or delete a customer from the table row.
- **Expandable Modals:** "Add Customer" and "Add Lead" flows, alongside detailed sidebar flyouts for viewing a single person's full profile.

## 3. Jobs

- **Job Metrics KPIs:** Overview of Open Jobs, Pending Approvals, Jobs Completed Today, Awaiting Invoices, and Average Job Duration.
- **Multi-Factor Filtering:** Ability to search and filter jobs by Status (Pending, Scheduled, In Progress, Completed, Invoiced), Job Type (Installation, Maintenance, Repair, Emergency), and specific Technician.
- **Comprehensive Jobs Table:** Displays detailed job info including address, service descriptions, time constraints, priority flags (Normal, High, Urgent), and financial amounts.
- **Inline Actions:** Options to View Details, Edit Job, Call/Email Customer, or Cancel Job directly from the table.

#### 4. Scheduling

- **Triple-View Layout:** Switch between **Dispatch Board** (timeline), **Calendar View**, and **Live Map**.
- **Scheduling KPIs:** Track Active Technicians, Jobs Scheduled Today, Average Response Time, and Route Efficiency.
- **Timeline Dispatch Board:** A horizontal Gantt-chart style timeline mapping technicians against daily hours, visually displaying occupied slots and allowing clicks on empty slots to assign tasks.
- **Technician Roster Table:** Lists staff by primary role, current operational status, current active job name, assigned service zone, and next available timeslot.
- **Quick Actions:** Send messages, open Live Map tracking, and trigger the "Add Schedule/Assign Job" modal.

#### 5. Finance

- **Financial KPIs:** Monthly Revenue, Accounts Receivable, Overdue Balances, Gross Profit Margin, and Pending Quotes value.
- **Tabbed Views:** Segregated boards for **Invoices**, **Quotes**, and **Expenses**.
- **Invoice Management:** Track invoice aging (days overdue), issue/due dates, and statuses (Draft, Sent, Paid, Overdue). Includes quick actions to send via email.
- **Quotes Workspace:** Track estimates, specific service proposals, and their statuses (Draft, Sent, Accepted, Rejected, Expired) with one-click conversion to Invoices.
- **Expense Tracking:** Log operational costs linked to materials, labor, fuel, and equipment, tying them directly back to specific Job IDs and Vendors.

#### 6. Communications

- **Unified Inbox Tabs:** Switch between direct **Messages** and automated **Notifications**.
- **Customer Chat Interface:** Real-time SMS/Email thread views tracking inbound and outbound messages. Includes read receipts and timestamps.
- **Rich Text Interactions:** Message composition with attachments , and rapid send features.
- **Notification Center:** Read/unread tracking of automated campaign logs, payment confirmations, service requests, and internal system updates.

#### 7. Analytics

- **Dynamic Revenue Chart:** Advanced area charting with toggles to view Monthly vs. Yearly perspectives, down to specific months and legacy years.
- **Correlation Charting:** Dual metrics comparing "Revenue vs. Jobs output" across the timeline.

- **Distribution Pie Charts:** Breakdowns for Job Statuses and specific Service Categories.
- **Acquisition Bar Charts:** Tracking New vs. Returning customer ratios across years.
- **Technician Leaderboard:** Paginated ranking of staff sortable dynamically by Revenue Generated, Jobs Completed, Star Rating, or percent Completion limits.

## 8. Settings

- **Profile Tab:** Modify the logged-in administrator's foundational data (Name, Bio, Contact info).
- **Company Tab:** Define core business records (VAT tracking, Registration numbers, exact physical mapping).
- **Appearance Options:** Theme switching (Light, Dark Blue, Full Black)
- **Security Control:** Current password validation and password reset functions.

## 9. Team

- **Role-based KPI Filters:** Quick-click filtering cards to see super admins vs dispatchers vs technicians.
- **Member Database:** Detailed table showing emails, phone numbers, exact role assignments, and last-login tracking.
- **Status Tracking:** Visibility into whether a team member is Online, Offline, or Away.
- **Administrative Security Operations:** Options to edit staff profiles, modify permissions, trigger forced password resets, and delete team members.
